

FIRE SECURITEX

INTERVENTION SUIT

The FIRE SECURITEX intervention suit is another of our well-tested products since it has been used for many years by more than 1,000 satisfied users in the field where saving lives is a matter of seconds. This simpler, lightweight suit is made of lighter materials that allow extremely fast movement and excellent mobility, while preserving its effective fire protection and comfort.

Reinforced Kevlar retractable strap on the back.

High-quality 'quick-release' zipper for quick opening in emergency.

Hook and loop fastener for sleeve adjustment, a moisture barrier on the inner side and a fire-retardant cuff with a thumb hole.

Inspection openings for checking the condition of all layers of the clothing (especially the membrane and thermal lining).

Numerous functional pockets with reinforced Kevlar puller Carabiners are inserted under the flaps of side pockets for hanging equipment.

Reinforced knee section with the possibility of inserting a flame-retardant knee pad.

1. Fire-retardant protection collar covering the entire neck. 2. Sling for a microphone attachment. 3. Hook and loop fastener for a tag.
4. Pocket for a radio. 5. Pocket for a flashlight. 6. Possible sleeve adjustment. 7. Possible waist adjustment. 8. Side pockets with flaps. 9. Yellow highly reflective stripes. 10. Optional silver reflective inscription on the back. 11. Removable and adjustable comfortable shoulder straps.

FIRE SECURITEX

INTERVENTION SUIT

WHEN SECONDS COUNT.

KEY FEATURES

- Two-piece suit with triple layers
- Ergonomic fit for increased comfort and manouverability
- Jacket Quick-release (Panic) front zipper for fast opening

MATERIALS

OUTER LAYER

75% Meta Aramid/23% Para Aramid/2% Antistatic fibres blend.

The binding material is twill, which makes it more comfortable but still robust enough to maintain good protection against mechanical damage.

MEMBRANE

High-quality heat-insulated PU membrane, which is known for its chemical resistance, thermal stability and hydrophobic qualities. It is characterised by a dense structure that retains water drops and at the same preserves vapour permeability.

THERMAL BARRIER

A blend of Meta and Para Aramid and FR viscose, with integrated Kevlar thread running along the fabric.

The TWIN SPACER – THERMAL INSULATION COMPLEX technology uses a system of air gaps or ducts to allow better and more efficient air circulation and prevent excessive build-up of warm air, thus reducing the risk of temperature shock.

The clothing has been tested according to EN 469: 2020 and EN ISO 13688: 2013 (X2, Y2, Z2), by MIRTA KONTROL d.o.o., Zagreb, Croatia (notified body no. 2474), which issued the certificate of conformity no. OZ0173-CPT002/21-A2/26.
